

DECATHLON

PLUS Polymers, manufacturers of specialised polymers and phase-change materials (PCMs) aided Team Shunya, India's entry at the Solar Decathlon Europe 2014 in demonstrating their idea of zero energy homes. The partnership between Plus and Team Shunya is to integrate phase change material (PCM) into its solar thermal system for water heating contributing to the other solar powered sustainable solutions in the house. The participating teams will be judged across 10 categories each carrying different weighing, hence the name Decathlon.

E-WASTE HAZARD

PLUSS Polymers, a materials research and manufacturing company, in association with Advit Foundation, organised a session on electronic waste management, at Manav Rachna International School, Gurgaon. After the session, collection bins were installed in the school. The e-waste collection process will continue for a month.
